

Alpine communities and territories
in a time of glacier loss and climate change

May 28-30, 2026 | Aosta, Italy
University of Aosta Valley

The calls are open!

oral presentations | thematic posters | project posters

The calls are open until 27 February 2026

ForumAlpinum 2026 is an onsite conference
The registration will open in spring 2026

NO FEE IS REQUIRED
FOR THE PARTICIPATION

apply now!

With a focus on environmental challenges, socio-economic transformations and adaptation strategies, the ForumAlpinum 2026 positions itself as a moment of multidisciplinary technical-scientific and political reflection on the consequences of deglaciation in Alpine regions (and beyond), with particular attention to environmental, cultural and economic impacts. The progressive retreat of glaciers, accelerated by climate change, is profoundly modifying the landscape, water resources, biodiversity and traditional activities of mountain communities. In some cases, this even includes the territorial structure created by humans over time through the construction of roads, settlements and pastures. The conference aims to identify emerging challenges, land-use conflicts and the impact of climate change, as well as new forms of resilience, regional development, territorial planning and social innovation. These are intended to address the aforementioned challenges and preserve the identity and sustainability of these territories for future generations. ForumAlpinum 2026 will take a closer look and will discuss different perspectives that go beyond the current situation.
